HTML LAB SHEET – 01

Solved Questions and Answers • BCA 3rd Semester • Session 2026–2027

Student Name: Vanshika Choudary

Web Technology Lab (BCA209P)

This document contains all 10 questions from the supplied lab sheet, each followed by beginner-friendly HTML source code, a representative output, and the result. Save each code block using the filename shown and open it in a web browser.

Note: Q8 uses image files `logo.png`, `computer.jpg` and `nature.jpg`. Keep these files in the same folder as q8.html for the images to appear.

Q1. Personal Information

Question: Create an HTML page displaying a student's personal information using heading, bold, underline, italic and paragraph tags.

Program / Source Code — q1.html

```
<html>
<body>
<h1>Vanshika Choudary</h1>
<b>BCA - 3rd Semester</b><br>
<u>COER University, Roorkee</u>
<p>I am a student who likes <i>coding</i>.</p>
</body>
</html>
```

Expected Output

```
Vanshika Choudary

BCA - 3rd Semester
COER University, Roorkee

I am a student who likes coding.
```

Result: The page displays student details using bold, italic, underline, heading and line-break formatting.

Q2. Text Formatting Tags

Question: Write an HTML program to demonstrate headings, bold, strong, italic, emphasis, underline, mark, subscript and superscript tags.

Program / Source Code — q2.html

```
<html>
<body>
<h1>Heading 1</h1>
<h3>Heading 3</h3>
<b>Bold</b> <strong>Strong</strong><br>
<i>Italic</i> <em>Emphasis</em><br>
<u>Underline</u> <mark>Marked</mark><br>
H<sub>2</sub>O and x<sup>2</sup>
</body>
</html>
```

Expected Output

```
Heading 1
Heading 3
Bold Strong
Italic Emphasis
Underline Marked
H■O and x²
```

Result: The page demonstrates common text-formatting tags, including subscript and superscript.

Q3. Unordered List

Question: Create an HTML page showing programming languages in unordered lists with disc, circle and square bullet styles.

Program / Source Code — q3.html

```
<html>
<body>
<h3>Languages</h3>
<ul>
  <li>Python</li>
  <li>Java</li>
</ul>
<ul type="circle">
  <li>C</li>
  <li>C++</li>
</ul>
<ul type="square">
  <li>JavaScript</li>
</ul>
</body>
</html>
```

Expected Output

```
Languages
• Python
• Java
■ C
■ C++
■ JavaScript
```

Result: The list displays five programming languages with different bullet styles.

Q4. Ordered List

Question: Write an HTML program to display the steps for creating a webpage as a numbered list.

Program / Source Code — q4.html

```
<html>
<body>
<h3>Steps to Create a Webpage</h3>
<ol>
  <li>Open an editor.</li>
  <li>Write HTML code.</li>
  <li>Save as page.html.</li>
  <li>Open in a browser.</li>
</ol>
</body>
</html>
```

Expected Output

```
Steps to Create a Webpage
1. Open an editor.
2. Write HTML code.
3. Save as page.html.
4. Open in a browser.
```

Result: The steps are displayed as a numbered list.

Q5. Nested Lists

Question: Create a nested list showing BCA and BBA courses with their subjects.

Program / Source Code — q5.html

```
<html>
<body>
<h3>College Courses</h3>
<ol>
  <li>BCA
    <ul>
      <li>Java</li>
      <li>HTML</li>
    </ul>
  </li>
  <li>BBA
    <ul>
      <li>Management</li>
      <li>Accounts</li>
    </ul>
  </li>
</ol>
</body>
</html>
```

Expected Output

```
College Courses
1. BCA
   • Java
   • HTML
2. BBA
   • Management
   • Accounts
```

Result: Courses are shown as an ordered list with nested subject lists.

Q6. Student Table

Question: Write an HTML program to create a student table containing ID, Name, Course, Semester and Marks.

Program / Source Code — q6.html

```
<html>
<body>
<table border="1">
  <tr>
    <th>ID</th><th>Name</th><th>Course</th><th>Sem</th><th>Marks</th>
  </tr>
  <tr>
    <td>101</td><td>Soni</td><td>BCA</td><td>3</td><td>85</td>
  </tr>
</table>
</body>
</html>
```

Expected Output

```
ID | Name | Course | Sem | Marks
101 | Soni | BCA | 3 | 85
```

Result: A table displays the student's ID, name, course, semester and marks.

Q7. College Timetable

Question: Create an HTML timetable demonstrating the rowspan and colspan attributes.

Program / Source Code — q7.html

```
<html>
<body>
<table border="1">
  <tr><th>Day</th><th>9-10</th><th>10-11</th><th>11-12</th></tr>
  <tr><td>Mon</td><td>HTML</td><td>Java</td><td rowspan="2">Lab</td></tr>
  <tr><td>Tue</td><td>Python</td><td>DBMS</td></tr>
  <tr><td>Wed</td><td colspan="2">Web Lab</td><td>Maths</td></tr>
</table>
</body>
</html>
```

Expected Output

```
Day | 9-10 | 10-11 | 11-12
Mon | HTML | Java | Lab
Tue | Python | DBMS | Lab (same cell spans two rows)
Wed | Web Lab (spans two columns) | Maths
```

Result: The timetable demonstrates rowspan (Lab spans two rows) and colspan (Web Lab spans two columns).

Q8. Display Images

Question: Write an HTML program to display a college logo, a computer image and a nature image.

Program / Source Code — q8.html

```
<html>
<body>
<img src="logo.png" width="80" alt="College logo">
<img src="computer.jpg" width="100" alt="Computer">
<img src="nature.jpg" width="100" alt="Nature">
</body>
</html>
```

Expected Output

```
[College Logo]    [Computer Image]    [Nature Image]
```

Result: Three images appear when logo.png, computer.jpg and nature.jpg are saved in the same folder as the HTML file.

Q9. Student Registration Form

Question: Create a student registration form with name, email, password, gender, date of birth, course, hobby, address, submit and reset controls.

Program / Source Code — q9.html

```
<html>
<body>
<h3>Registration</h3>
<form>
  Name: <input><br><br>
  Email: <input type="email"><br><br>
  Password: <input type="password"><br><br>
  Gender: <input type="radio" name="g">M
          <input type="radio" name="g">F<br><br>
  DOB: <input type="date"><br><br>
  Course: <select><option>BCA</option><option>BBA</option></select><br><br>
  Hobbies: <input type="checkbox">Reading<br><br>
  Address: <textarea></textarea><br><br>
  <input type="submit">
  <input type="reset">
</form>
</body>
</html>
```

Expected Output

```
Registration
Name: [_________________]
Email: [_________________]
Password: [_________________]
Gender: ( ) M  ( ) F
DOB: [date picker]
Course: [BCA ▼]
Hobbies: [ ] Reading
Address: [text area]
[Submit] [Reset]
```

Result: The form displays fields for student details, hobbies and address, plus submit and reset buttons.

Q10. College Admission Page

Question: Create an admission page for COER University containing a heading, welcome message, course list, course-duration table and admission form.

Program / Source Code — q10.html

```
<html>
<body>
<h1>COER University</h1>
<p>Welcome to admissions.</p>
<h3>Courses</h3>
<ul><li>BCA</li><li>BBA</li></ul>
<table border="1">
  <tr><th>Course</th><th>Years</th></tr>
  <tr><td>BCA</td><td>3</td></tr>
</table>
<h3>Apply</h3>
<form>
  Name: <input><br><br>
  Email: <input type="email"><br><br>
  <input type="submit">
</form>
</body>
</html>
```

Expected Output

```
COER University
Welcome to admissions.

Courses
• BCA
• BBA

Course | Years
BCA    | 3

Apply
Name: [_____________]
Email: [_____________]
[Submit]
```

Result: The page combines a heading, welcome paragraph, course list, table and admission form.
